How to take Ultracet?

Take Ultracet by mouth as specified by your doctor, generally every 4 to 6 hours for pain relief. You can take this drug with or without food. If you have nausea, taking this medication with food may help. Never take this medication in larger doses or for a longer period of time than prescribed. You must inform your doctor if you have an increased desire to take more of this medication.

The dosage depends on your medical condition and response to treatment. The maximum recommended daily dose is 8 tablets. Don't increase your dose, take it more constantly, or take it for a longer period of time than prescribed. Take this medication no more than 5 days in a row.

Stopping this medication abruptly may cause withdrawal symptoms, especially if you have been taking it for a long time or in high doses .

Medicinal Benefits

Ultracet Tablet is used to treat pain. Tramadol targets pain receptors in the central nervous system. It acts by blocking the nerve signals responsible for pain. Paracetamol acts as an analgesic by inhibiting the release of chemical mediators that cause pain. Tramadol and paracetamol, in combination, have a faster onset of action and provide quick relief from the pain.

Side Effects of Ultracet Tablet

- Nausea
- Vomiting
- Constipation
- Dry Mouth
- Weakness
- Blur Vision
